DETAILED ACTION

Claim Objections

1. Claims 4-6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n).

Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 2 recites the broad recitation "smaller than or identical to", and the claim also recites preferably to 50% which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rolle (U.S. 2002/0050480) in view of Rising et al. (U.S. 5,221,311). Rolle discloses the claimed invention except for the container and stopper being glass. Rising et al. teach that it is known to provide a container and closure which are glass. Additionally, Rolle also teaches that it is known to construct the containers from glass (see paragraph [0003]). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container assembly of Rolle with the container and stopper being made of glass, as taught by Rising et al., in order to use a well known material which is easily cleaned.

Regarding the relative thickness of the plug, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the invention of Rolle with the thickness of the glass plug being 50% of the wall thickness of the filling neck, since change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rolle (U.S. 2002/0050480) in view of Rising et al. (U.S. 5,221,311), as applied to claims 1 and 2, and further in view of Yaniger (U.S. 6,613,406). The modified invention of Rolle discloses the claimed invention except for the lettering. Yaniger teaches that it is known to provide a plug with lettering. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified invention

Art Unit: 3781

of the Rolle with the plug having lettering, as taught by Yaniger, in order to indicate the contents to the user.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art is cited for the plug structure.

8. THIS ACTION IS NON-FINAL.
